#### VIDEO FOLKS:

Use channel 1-2 for a your edits. We can then take them into post to remix the music. It may be most useful to pick a take as the main audio to make cuts to. You know what you are doing.

The room did not sound good. Very boomy around 100Hz. Sounds like Polka.

Hit me up if you've got questions. I'm going to hold onto all the original audio just in case.
